

September 2023

Summary

Progress continues on the Health System Catalogue. We now have 167 medical device suppliers who have published data and 184,783 GTINs live in the catalogue.

We continue to work with an additional 60 suppliers to get data sets complete for publishing. Focus also continues on getting pricing information from suppliers who have only published item data to-date.

We are currently loading images and documents from early adopter suppliers and are now ready to work with all suppliers to gather this information (*see page 3*).

GSI, as our preferred publishing partner continues to work with suppliers, as we work towards a comprehensive product catalogue. We intend to utilise the GSI media library service in order to bring images and documents into the catalogue.

Discussions have now also begun with suppliers of other product categories, and we expect to publish our first data from these suppliers shortly.

We are also in discussions with several suppliers regarding the adoption of EDI, which will streamline the procure to pay processes. If you are interested in being part of EDI, feel free to contact the HSC Supplier Engagement Lead.

Thank you for your ongoing support as we continue to develop the Health System Catalogue to support Te Whatu Ora – Health New Zealand.

For further information or enquiries, please contact hsc@nzhp.health.nz

COMPLETED (since last update)

- We now have a total of 167 Suppliers who have provided product data.
- 26 Suppliers are now publishing data through the supplier portal.
- All Districts now onboarded to the Health System Catalogue (HSC) and the Spend Data Repository (SDR).
- First images and documents published into the HSC.
- Discussions underway with Additional Product Category suppliers.

PLANNED (for next period)

- Continue to get product & pricing data.
- Implement the agreed process for logistics and supply chain providers.
- Continue to match items, suppliers, pricing into the HSC master catalogue for districts to easily search
- Start ingesting images and documents from other suppliers.
- Data published for first additional product category suppliers.

Timeframes for publishing data to the HSC

The expectation from Te Whatu Ora was that all medical device suppliers would have published their complete data sets by the end of June 2023. For many suppliers this expectation has not been met. We also continue to work with a large group of suppliers to get pricing data (for those who have previously provided item data only).

It is critical that we get complete data sets as soon as possible, so that we can increase our match rate with other data sources and improve the data alignment throughout the sector. If you are in this category, please contact Ian Malone, the Supplier Engagement Lead for the HSC at ian.malone@nzhp.health.nz.

Moving forward, the following conditions will be applied to Medical Device Suppliers:

- Future tenders will require HSC participation in order to be successful.
- Participation in the HSC will be used as a criterion in product and supplier selection decisions.
- Publishing complete data sets to the HSC will be a pre-requisite to any new EDI engagement.

The Health System Catalogue is increasingly becoming the primary source of product data for the Health System, make sure your products are included and visible to HSC users.

Additional product categories

We have now begun conversations with additional product category suppliers. Some of these suppliers have already published medical device information, but many will be new to HSC. We are keen to get more data published to the HSC in the coming months as we continue to build to a comprehensive product catalogue for the Te Whatu Ora public hospitals.

If you supply products to the public hospitals, we are keen to talk to you. If we haven't talked with you yet, please make contact so that we set up an initial discussion.

At this stage, we have already received data from 3 pharmaceutical suppliers and are finalising data sets for three other product category suppliers.

If you sell products to the Te Whatu Ora districts, we would like to get your products into the Health System Catalogue.

Images, documents & other product information

We have now developed the capability to support the inclusion of images, technical specifications and other documents in the HSC. These will be attached to the relevant products and will be visible to HSC users.

We look forward to implementing this functionality as it provides additional value to users of the HSC, provides a central place for Suppliers to load this information, and further develops the HSC as the central source of all product related information.

Please find below a screenshot from the HSC, showing how the images and documents appear in the catalogue. Many thanks to Whiteley Corporation for working with us as an early adopter for images and document and for allowing us to use this example in the Supplier Update.

If you would like to use the HSC as the central place to provide your product documentation, please talk to us!

Supplier: Whiteley Corporation NZ Limited

Product Range: VIRACLEAN

The screenshot shows the HSC interface. At the top, there are navigation options like 'Actions', 'Create item', and 'Master catalog (6)'. Below that is a filter bar for 'Trade Item Description (New Zealand, English)' with a search box containing 'VIRACLEAN'. A table lists six products with columns for 'Thumbnail', 'GTIN', 'Trade Item Description (New Zealand, English)', 'Status', and 'Item no.'. The first product is 'VIRACLEAN 1 X 500 ML TRIG SPRAY' with a 'New' status. Below the table, the detailed view for 'Item Article_1616580920395427' is shown. It has tabs for 'Media', 'Product 360° view', 'Header', 'Preview', 'Text', 'Prices', 'Core item', 'Regulatory', 'Supplier Details', 'Logistics', 'Classification', 'Cross Reference ids', 'Quality status', and 'Change information'. The 'Media' tab is active, showing a grid of media items: a 'Thumbnail Product..ckaging' (with a plus icon), a 'Product Image Product..ckaging', a 'Product Image Product..JFamily', a 'Technic..rmation Whitele..ulletin', a 'Regulatory Whitele..n 2-GHS', and a 'Product..rmation Viracle..rochure'. Below the media grid, there are fields for 'File Name', 'Media Type', and 'Media Sub Type'.
