

May 2023

### Summary

Progress continues on the Health System Catalogue. We now have a total of 157 medical device suppliers providing a total of over 170,000 GTINs.

We continue to work with an additional 63 suppliers to get data sets complete for publishing. Focus also continues on getting pricing information from suppliers who have only published item data.

We have completed testing of loading and viewing images and documents and will begin to ingest these soon. We will be adding new product categories to the HSC soon and working with a wider range of suppliers to source data for those.

**Thank you for your ongoing support as we continue to develop the Health System Catalogue to support Te Whatu Ora – Health New Zealand.**

### Progress Update

- We continue to work closely with GS1 to onboard suppliers and data through the GS1 National Product Catalogue – our preference for publishing data to the HSC.
- We will also utilise the GS1 media library to allow us to bring in images and documents to enhance the product information in the HSC.
- We have 22 Suppliers who have published data through the Supplier Portal – our alternative mechanism for publishing data.
- We are progressing our adoption campaign, which involves working closely with Te Whatu Ora Districts to increase the use of, and value delivered by, the Health System Catalogue.
- Escalations will now commence within Te Whatu Ora for Suppliers who have not met the time expectations for publishing complete data sets to the HSC.

***For further information or enquiries, please contact [hsc@nzhp.health.nz](mailto:hsc@nzhp.health.nz)***

#### COMPLETED (since last update)

- We now have a total of 157 Suppliers who have provided product data.
- 22 Suppliers are now publishing data through the supplier portal.
- A further 63 medical device suppliers are engaged and preparing data.
- Testing completed for images and documents.
- The scope for Additional Product Categories is now defined and we will commence engagement with Suppliers.

#### PLANNED (for next period)

- Continue to get product & pricing data.
- Implement the agreed process for logistics and supply chain providers.
- Continue to match items, suppliers, pricing into the HSC master catalogue for districts to easily search
- Work with early adopter suppliers to ingest images and other product documents in the HSC.
- Commence data collection for additional product categories.

## Timeframes for publishing data to the HSC

### **National Contracted Suppliers:**

The timeframe for National Contracted Suppliers to publish their item and pricing data to the HSC was **31-Dec-22**, and there are still a large number who have not published data or have only provided item information. In order to increase our match rates with other data sources, it is critical that we get a complete set of item and price data as soon as possible. Discussions and follow-up with individual suppliers will now be escalated within Te Whatu Ora and Pharmac. Please contact GSI or HSC directly to progress the publishing of your complete data set.

### **All other Medical Device Suppliers:**

The timeframe for all other medical device suppliers to publish their data to HSC (product and price information) is **30-Jun-23**, which is fast approaching. For suppliers who have already provided data to the HSC, please ensure you load your complete data sets, including price information. If you have any questions or would like to discuss further, please contact Ian Malone, the supplier engagement lead for the HSC at [ian.malone@nzhp.health.nz](mailto:ian.malone@nzhp.health.nz).

## Additional Product Categories

The scope of Additional Product categories is now finalised, and we have commenced discussions with a wider group of product suppliers. We will continue to liaise with industry groups and GSI as we progress.

In broad terms, the additional categories include most products that are routinely purchased and used in Te Whatu Ora hospitals, including Medicines.

***If you sell products to the Te Whatu Ora districts, we are keen to talk to you about getting your products into the HSC.***

## Images, Product Specifications and Documents

The development of functionality to support the inclusion of images, technical specifications and other documents is now complete.

We will be working with a few early adopter suppliers, who have indicated that they would be happy to provide images and other documents to the HSC. As part of our adoption campaign, we will work with our District users to identify the most beneficial documents for inclusion in the HSC. These will include safety data sheets, products specifications, regulatory information and certifications.

We look forward to implementing this functionality as it provides additional value to users of the HSC, provides a central place for Suppliers to load this information, and further develops the HSC as the central source of all product related information.

## Suppliers Providing Data to the HSC

3M New Zealand Limited	Dentsply Sirona
