

August 2020 Release Overview

This release contains features in the Phase 2 2020 development plan.

New Features

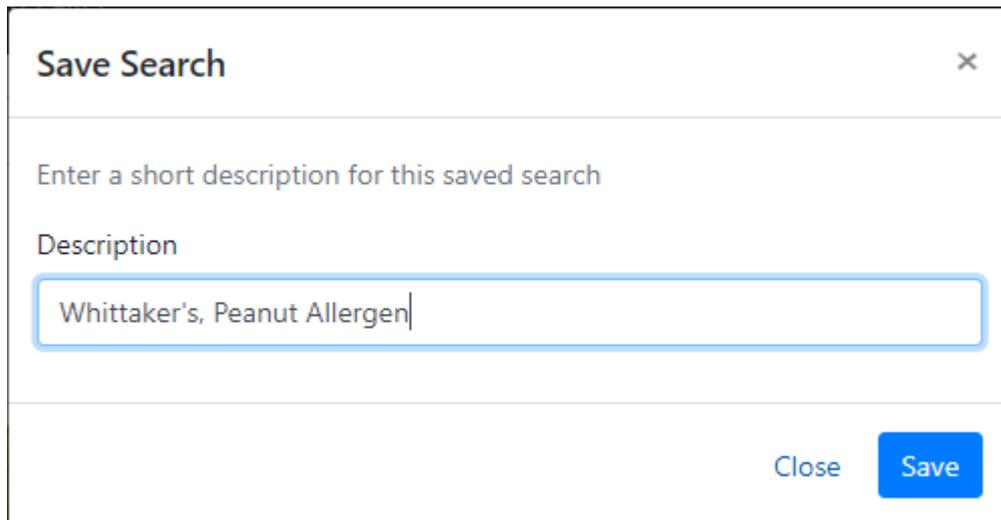

Any search a user conducts can be saved to their individual login account. After a search is done, it can be saved by clicking "Save", next to the search parameters, below the keyword search bar.

The screenshot displays a search interface with the following elements:

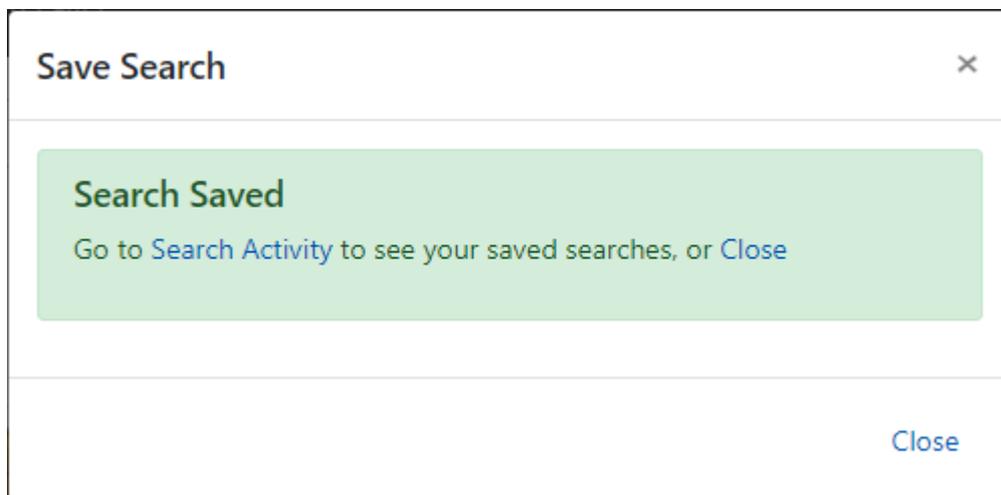

- Search bar: "All Categories (GPC)" dropdown, search input field, "Search" button, "Reset Search", "Advanced Search", and "Search Activity" links.
- Filters: "Brand: Contains Whittaker's" and "Allergen: Contains Peanut" with "x" icons to remove them. "Filter", "Save", and "Share" buttons are also present.
- Download button: "Download (72)".
- Results: "Results: 1 to 50 of 72 products".
- Product 1:  **Whittaker's Minimix Creamy Milk Hokey Pokey Almond Gold Peanut Slab Tweats Fifteen Assorted Mini Slabs 228g**
9403142002573
Chocolate and Chocolate/Sugar Candy Combinations - Confectionery
- Product 2:  **Whittaker's Dark Chocolate Ghana Peppermint 220g**
9403142002375
Chocolate and Chocolate/Sugar Candy Combinations - Confectionery
- Product 3:  **Whittaker's Coconut Block**

The user will be prompted to give their saved search a name for future reference.

The image shows a 'Save Search' dialog box. At the top left is the title 'Save Search' and a close icon 'x' at the top right. Below the title is the instruction 'Enter a short description for this saved search'. Underneath is the label 'Description' followed by a text input field containing the text 'Whittaker's, Peanut Allergen'. At the bottom right of the dialog are two buttons: 'Close' and 'Save'.

Once it is saved, the user will be prompted to either go to their Search Activity or close the dialogue box.

The image shows a confirmation dialog box titled 'Save Search' with a close icon 'x' at the top right. The main content is a green box with the text 'Search Saved' and 'Go to [Search Activity](#) to see your saved searches, or [Close](#)'. At the bottom right of the dialog is a 'Close' button.

Search Activity can also be accessed at any point from the top of the page or next to the Advanced Search option. The Search Activity page displays all of the user's Saved Searches and Search History. From there, a user can re-run, share, download, and remove their Saved Searches.

A user can share a search from their Search History, list of Saved Searches, or directly from the results page. To share a search with another user from the results page, click "Share" next to the "Save" option below the keyword search bar.

Enter the email address of another On Pack user and click "Send" to send them an email that contains a link to run whichever search you've shared with them.

Share Search Link via Email ✕

Email Address (Recipient)

Note: The recipient must have an On Pack login to access the link

Close Send

Clicking this link will take the recipient to the On Pack webpage. Once they login, the shared search will be run.

onpack@gs1nz.org

to me ▼

An On Pack search link has been shared with you, see below:

https://beta-onpack.gs1nz.org/search?page=1&gpc=50180000&field=Origin&term=Canada*

Please Note: A login to On Pack is required to access this link.

There is now a Reset Search option to the right-hand side of the keyword search bar. Clicking this will re-run the search with all search parameters removed.

Filter Save Share

Users can now narrow their search results down based on nutrient values in the Per 100 g/ml column of Nutrition Information panels on products.

The Nutrient Filter can be found on the left-hand side of any Search page or by clicking "Filter", next to the "Save" and "Share" options that appear after running a search.

Users can search for products that have specific amounts of a nutrient by entering both a numerical minimum and maximum amount and clicking "Apply".

Entering "0" into the Minimum field will result in a search that includes products that have "0" for the nutrient value in the Nutrition Information Panel.

Leave the minimum blank to include products with no value for that nutrient.

Leave the maximum blank to include products up to the maximum value in the database.

The search only applies to the most recently captured version of any product.

1 Bug Fix

Search parameters can now be successfully removed by clicking the "x" on the search parameter bubble. At that time the search will automatically re-run without the removed search parameter.

1 Improvement

Numerical Nutrition Information panel values in the excel download sheet are now in number format by default.

Other Changes

[GS1 NZ | On Pack](#) [Search](#) [Search Activity](#) [GPC Lookup](#) [GPC Browser](#) [Release Notes](#) [Help / FAQ](#)

There are access links to the Global GS1 Browser tool, GS1 New Zealand's GPC Lookup tool, and Support Centre at the top of the On Pack webpage.

Clicking "Release Notes" or "Help/FAQ" opens up new tabs accessing GS1 New Zealand's Support Centre. The Support Centre contains helpful articles about On Pack and the Release Notes for developments made to On Pack in 2020.
